

First Impressions Are Everlasting

2010 Flowers for Seasonal Color

Here is a list of flowers that Adopt-A-Spot Sponsors may plant in an approximate 2' X 4' oval area underneath and around their new sign to give their site that personal touch and extra ZIP of seasonal color! Please remember that annual flowers will need to be watered almost daily to be maintained and look nice throughout the season, and old blooms should be removed on a weekly basis. If your flowers die, please remove them.

Early Spring

late March to early May

- * Pansies –lots of colors and ‘cold hardy’!

Summer

mid-May to September

Here are some potential, hardy annuals that can be used for that extra flash of color under your sign!

- * Petunias (“Madness” is a good variety of petunia that does not get too “leggy”)
- * Salvia
- * Marigolds
- * Dusty Miller (silvery/white foliage)

(remember to get the shorter varieties so the mature plants are not taller than your sign)

Fall

September to November

- * Chrysanthemums
- * Asters
- * Ornamental Cabbage
- * Pansies

Bulbs to plant for Spring color in late October to mid-November

(bulbs should be planted in ‘clumps’ for the most dramatic effect!)

- * Daffodils
- * Crocus
- * Tulips
